STEER CARCASS CONTEST

The annual carcass contest, held in conjunction with the Southeastern Youth Fair, emphasizes the end product of the beef industry and provides a valuable educational complement to the Steer Show. A comprehensive report is prepared following the judging of the carcass qualities using ultrasound. The ultrasound report measurements will include FOE (fat over the rib eye at the 13th rib), rib eye area, and marbling score, which is a measurement of intramuscular fat. These measurements will be used to calculate yield grade and estimate carcass quality.

1. All steers accepted at the final weigh-in for the Southeastern Youth Fair Steer Show and Sale will be eligible and measured for the carcass contest.

2. The measurements taken by ultrasound at the final weigh-in will be evaluated by the University of Florida's Animal Meat Science Department to determine carcass contest winners.
